## GEM230-D Single Phase Direct Connection Energy Meter

### GEM230-D

- IEC 62053-21 / EN50470-1/3 MID Class B energy meter
- Single phase direct connection up to 100A
- Nominal voltage,  $U_n$  120V or 230Vac
- Operating voltage 80% ~ 120% of  $U_n$
- Maximum rate current,  $I_{max}$  100A
- Overload 30  $I_{max}$  for 0.01s
- AC voltage withstand 4kV for 1 minute
- Impulse voltage withstand 6KV for 1.2 $\mu$ seconds
- Operational frequency range 50 or 60Hz
- Internal power consumption  $\leq$  2W/10VA
- IP51(indoor) protection
- CAT II installation category
- RS485 Modbus RTU output
- 1000imp/kWh

# 01 - PRODUCT INFORMATION

## GEM630-D Three Phase Direct Connection Energy Meter

**GEM630-D-**

- IEC 62053-21 / EN50470-1/3 MID Class B energy meter
- Three phase direct connection up to 100A
- Nominal voltage,  $U_n$  3x230/400Vac
- Operating voltage 80% ~ 120% of  $U_n$
- Maximum rate current,  $I_{max}$  100A
- Overload 30  $I_{max}$  for 0.01s
- AC voltage withstand 4kV for 1 minute
- Impulse voltage withstand 6KV for 1.2 $\mu$ seconds
- Operational frequency range 50 or 60Hz
- Internal power consumption  $\leq$  2W/10VA
- IP51(indoor) protection
- CAT III installation category
- RS485 Modbus RTU output
- 400imp/kWh

# 01 - PRODUCT INFORMATION

## GEM630-CT Three Phase CT Operated Energy Meter

### GEM630-CT

- IEC 62053-21 / EN50470-1/3 MID Class B energy meter
- Three phase CT operated / 333mV
- Nominal voltage,  $U_n$  3x230/400Vac
- Operating voltage 60% ~ 120% of  $U_n$
- Maximum rate current,  $I_{max}$  333mV / 5A CT
- Overload 20  $I_{max}$  for 0.01s
- AC voltage withstand 4kV for 1 minute
- Impulse voltage withstand 6KV for 1.2 $\mu$ seconds
- Operational frequency range 50 or 60Hz
- Internal power consumption  $\leq$  2W/10VA
- IP51(indoor) protection
- CAT III installation category
- RS485 Modbus RTU output
- 3200imp/kWh

## 03 – DEVICE SETUP (GEM230-D)

Buttons	Normal Mode	Setup Mode
	<p>➤ Displays measured values:</p> <ul style="list-style-type: none"><li>• Active Energy: Total kWh, T1 total kWh, T2 total kWh, Import kWh, Export kWh, Resettable kWh</li><li>• Reactive Energy: Total kvarh, T1 total kvarh, T2 total kvarh, Import kvarh, Export kvarh, Resettable kvarh</li><li>• Maximum Power Demand</li><li>• Voltage</li><li>• Current</li><li>• Active Power</li><li>• Reactive Power</li><li>• Apparent Power</li><li>• Power Factor</li><li>• Frequency</li><li>• Pulse Constant</li><li>• Continuous running time</li></ul>	<p>➤ “Left” or “Back” button</p> <p>➤ Exit from the menu</p>
		<p>➤ Press 3s, for Set-up mode entry</p>

## 03 – DEVICE SETUP (GEM230-D)

### Setup Entry

- Press  for 3 seconds
- Enter Password (Default: 1000)
- Press  for 3 seconds to confirm entry

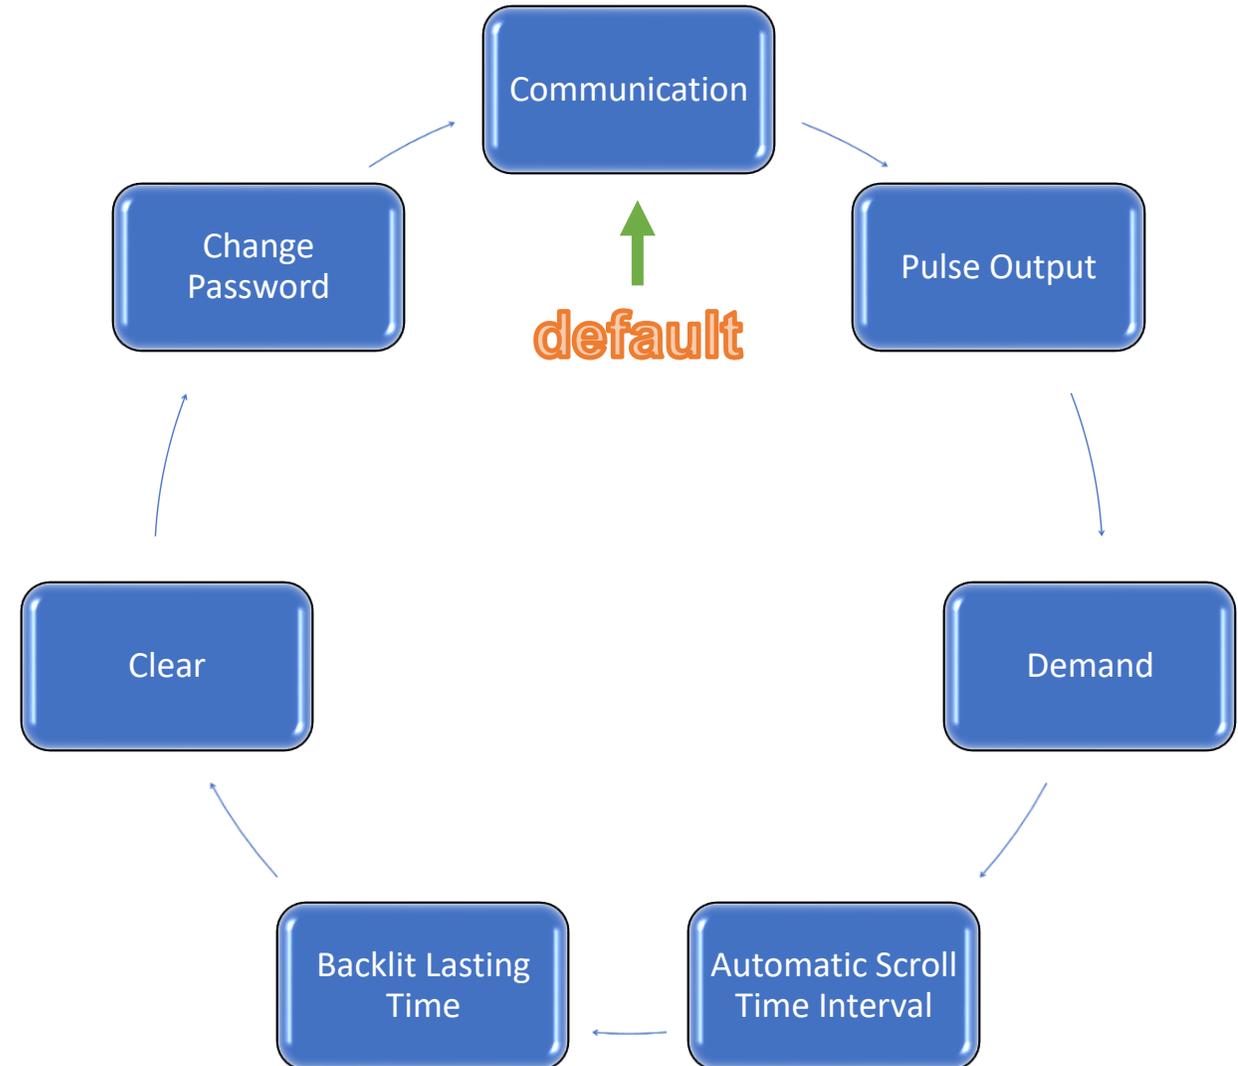

## 03 – DEVICE SETUP (GEM230-D)

### General Menu

- Graphic depicts the categories available for configuration, in sequence
- Press  to change configuration category
- Press  to confirm selection
- Press  to change configuration setting
- Press  to confirm setting

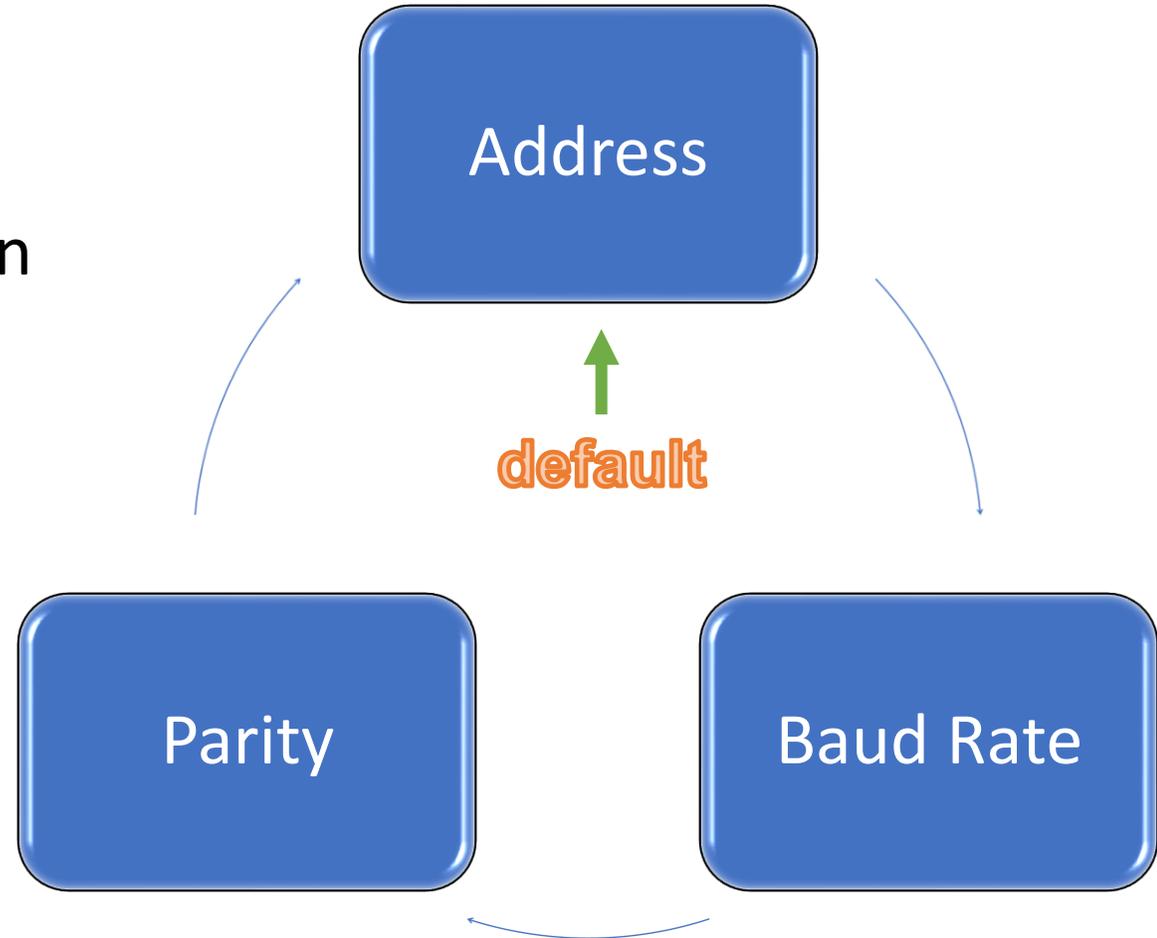

## 03 – DEVICE SETUP (GEM230-D)

### i. Communication Setup

- Graphic depicts the categories available inside communication setting, in sequence

## 03 – DEVICE SETUP (GEM230-D)

### i. (a) Communication - Meter Address

- Once Password is entered, **Meter Address** will be the default page
- Press  the first digit starts flashing
- Press  to change meter address, range 001-247
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

Add 001

Add 001

Good

Err

## 03 – DEVICE SETUP (GEM230-D)

### i. (b) Communication - Baud Rate

- Press  till red part starts flashing
- Press  to change baud rate, range 1200, 2400, 4800 and 9600bps
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

bd 9600

bd 9600

Good

Err

## 03 – DEVICE SETUP (GEM230-D)

### i. (c) Communication - Parity

- Press  till red part starts flashing
- Press  to change parity, option None, Even and Odd
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

Prty n

Prty n

Good

Err

## 03 – DEVICE SETUP (GEM230-D)

### ii. (a) Pulse Output

- Press  till red part starts flashing
- Press  to change pulse output 1, option kWh, kVarh, Imported kWh, Exported kWh, Imported kVarh and Exported kVarh
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

## 03 – DEVICE SETUP (GEM230-D)

### ii. (b) Pulse Constant

- Press  till red part starts flashing
- Press  to change pulse constant, option 1000 / 100 / 10 / 1
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails.

cSt 1000

Good

Err

## 03 – DEVICE SETUP (GEM230-D)

### ii. (c) Pulse Duration

- Press  till red part starts flashing
- Press  to change pulse duration, option 200ms / 100ms / 60ms
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

PLS t

PLSt200

Good

## 03 – DEVICE SETUP (GEM230-D)

### iii. Demand Integration Time

- Press  till red part starts flashing
- Press  to change demand integration time, option off (0) / 5 / 10 / 15 / 30 / 60min
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

## 03 – DEVICE SETUP (GEM230-D)

### iv. Automatic Scroll Time Interval

- Press  till red part starts flashing
- Press  to enable and define automatic scroll time interval, range 0~30s
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

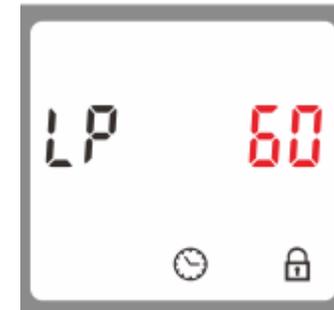

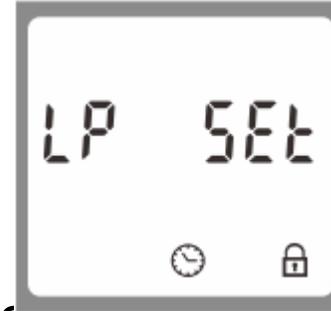

## 03 – DEVICE SETUP (GEM230-D)

### v. Backlit Lasting Time

- Press  till red part starts flashing
- Press  to enable and define backlit lasting time, option off (0) / 5 / 10 / 20 / 30 / 60mins
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

## 03 – DEVICE SETUP (GEM230-D)

### vi. Clear

- Press  till red part starts flashing
- Press  to reset maximum demand of active power or resettable energy
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

## 03 – DEVICE SETUP (GEM230-D)

### vii. Change Password

- Press  till red part starts flashing
- Press  to reset default password and configure new password
- Press  to confirm setting
- “Good” wording appears when setting is done correctly
- “Err” appears when then entered information is wrong, operation fails

## 03 – DEVICE SETUP (GEM630-D-M)

Buttons	Normal Mode	Setup Mode
	<ul style="list-style-type: none"> <li>➤ Displays voltage and current information of the selected system type (3p4w, 3p3w and 1p2w)</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Left” or “Back” button</li> <li>➤ Exit from the menu</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display power factor, frequency and maximum demand</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Up” button</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display active power, reactive power and apparent power information of the selected system type</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Down” button</li> <li>➤ Reduce value when configure meter setting</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display total / import / export active or reactive energy information of the selected system type.</li> <li>➤ Right side move</li> </ul>	<ul style="list-style-type: none"> <li>➤ Set-up mode entry</li> <li>➤ Default password 1000</li> <li>➤ “Enter” or “Right” button</li> </ul>

## 03 – DEVICE SETUP (GEM630-D-M)

### Setup Entry

- Press  for 3 seconds
- Use  and  to enter password (Default: 1000)
- Press  for 3 seconds to confirm entry
- If incorrect password is entered, “Err” wording will display

## 03 – DEVICE SETUP (GEM630-D-M)

### i. Change Password

- Press  to enter the change password routine and new password screen appears with first digit flashing
- Use  and  to set first digit and press  to confirm the selection, the next digit will flash
- Repeat procedure for remaining 3 digits
- “SET” wording appears when new password is saved successfully

Step 1

Step 2

Step 3

Step 4

## 03 – DEVICE SETUP (GEM630-D-M)

### ii. Demand Integration Time

- Press  to enter selection routine
- Use  and  to change demand integration time, option off (0) / 5 / 10 / 15 / 30 / 60min
- Press  to confirm setting
- “SET” wording appears when new DIT is configured and saved successfully

Step 1

Step 2

Step 3

Step 4

## 03 – DEVICE SETUP (GEM630-D-M)

### iii. Supply System

- Press  to enter selection routine
- Use  and  to determine supply system mode, option 1P2(W), 3P3(W) and 3P4(W)
- Press  to confirm setting
- “SET” wording appears when new DIT is configured and saved successfully

Step 1

Step 2

Step 3

Step 4

## 03 – DEVICE SETUP (GEM630-D-M)

### iv. Backlit Lasting Time

- Press  to enter selection routine
- Use  and  to configure backlit lasting time, option 0 (always ON) / 5 / 10 / 30 / 60 / 120mins
- Press  to confirm setting
- “SET” wording appears when backlit lasting time is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### v. (a) Pulse Output

- Press  to enter selection routine
- Use  and  to choose pulse output, option kWh, kVarh, Imported kWh, Exported kWh, Imported kVarh and Exported kVarh
- Press  to confirm setting
- “SET” wording appears when pulse output is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### v. (b) Pulse Rate

- Press  to enter selection routine
- Use  and  to choose pulse rate, option dFt / 0.01 / 0.1 / 1 / 10 / 100 kWh/kVarh
- Press  to confirm setting
- “SET” wording appears when pulse rate is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### v. (c) Pulse Duration

- Press  to enter selection routine
- Use  and  to change pulse duration, option 200 / 100 / 60ms
- Press  to confirm setting
- “SET” wording appears when pulse duration is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### vi. (a) Communication - Meter Address

- Press  till the first digit starts flashing
- Use  and  to change meter address, range 001-247
- Press  to confirm setting
- “SET” wording appears when new meter address is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### vi. (b) Communication – Baud Rate

- Press  till the baud rate starts flashing
- Use  and  to change to desired baud rate setting
- Press  to confirm setting
- “SET” wording appears when new baud rate is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### vi. (c) Communication – Parity

- Press  till the parity starts flashing
- Use  and  to change to desired parity setting, option None, Even and Odd
- Press  to confirm setting
- “SET” wording appears when new baud rate is configured and saved successfully

## 03 – DEVICE SETUP (GEM630-D-M)

### vi. (d) Communication – Stop Bit

- Press  till the stop bit starts flashing
- Use  and  to change to desired stop bit, option 1 or 2
- Press  to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully

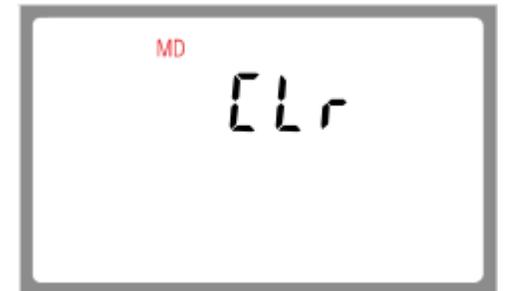

## 03 – DEVICE SETUP (GEM630-D-M)

### vii. Clear

- Press  till MD red wording starts flashing
- Press  to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully
- Only maximum demand value of current and voltage can be reset

# 03 – DEVICE SETUP (GEM630-CT)

Buttons	Normal Mode	Setup Mode
	<ul style="list-style-type: none"> <li>➤ Displays voltage and current information of the selected system type (3p4w, 3p3w and 1p2w)</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Left” or “Back” button</li> <li>➤ Exit from the menu</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display power factor, frequency and maximum demand</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Up” button</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display active power, reactive power and apparent power information of the selected system type</li> </ul>	<ul style="list-style-type: none"> <li>➤ “Down” button</li> <li>➤ Reduce value when configure meter setting</li> </ul>
	<ul style="list-style-type: none"> <li>➤ Display total / import / export active or reactive energy information of the selected system type.</li> <li>➤ Right side move</li> </ul>	<ul style="list-style-type: none"> <li>➤ Set-up mode entry</li> <li>➤ Default password 1000</li> <li>➤ “Enter” or “Right” button</li> </ul>

## 03 – DEVICE SETUP (GEM630-CT)

### Setup Entry

- Press  for 3 seconds
- Use  and  to enter password (Default: 1000)
- Press  for 3 seconds to confirm entry
- If incorrect password is entered, “Err” wording will display

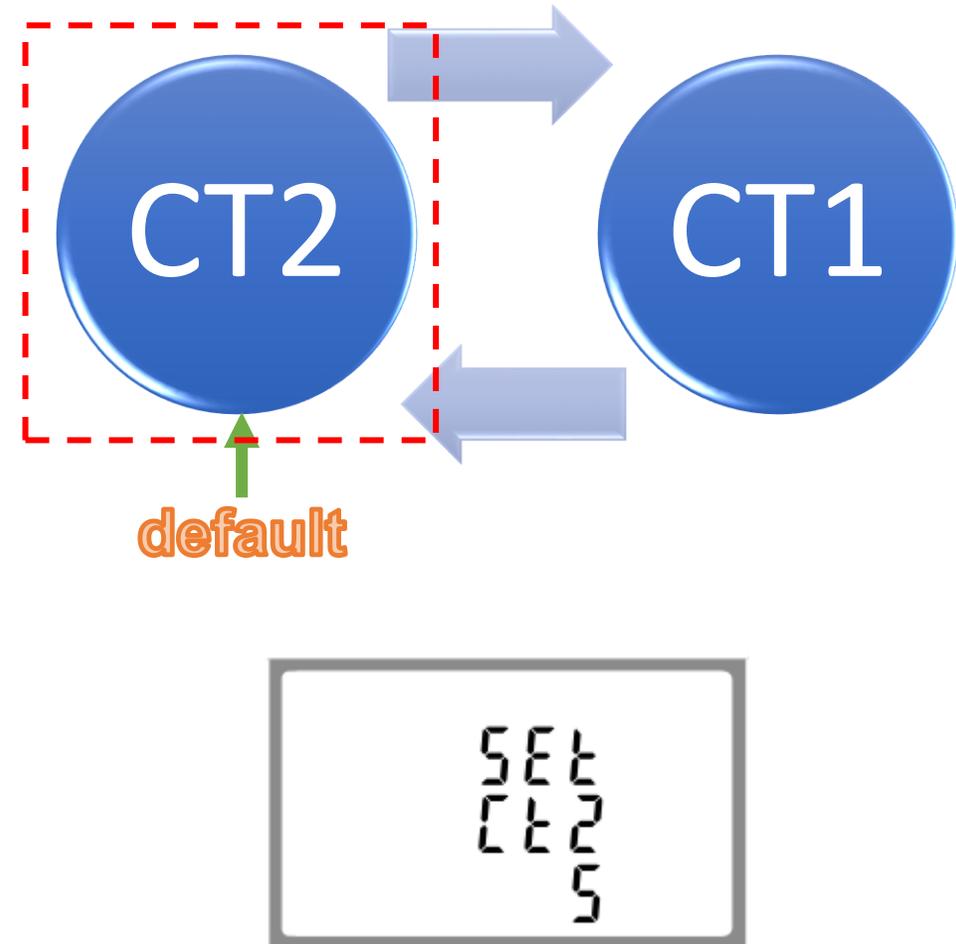

## 03 – DEVICE SETUP (GEM630-CT)

### iv. (a) Current Transformer (CT) – CT2

- Graphic depicts the categories available inside CT, in sequence
- CT2 secondary current input
- Use  and  to choose the CT2 rating, on 5A or 1A
- Press  to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully

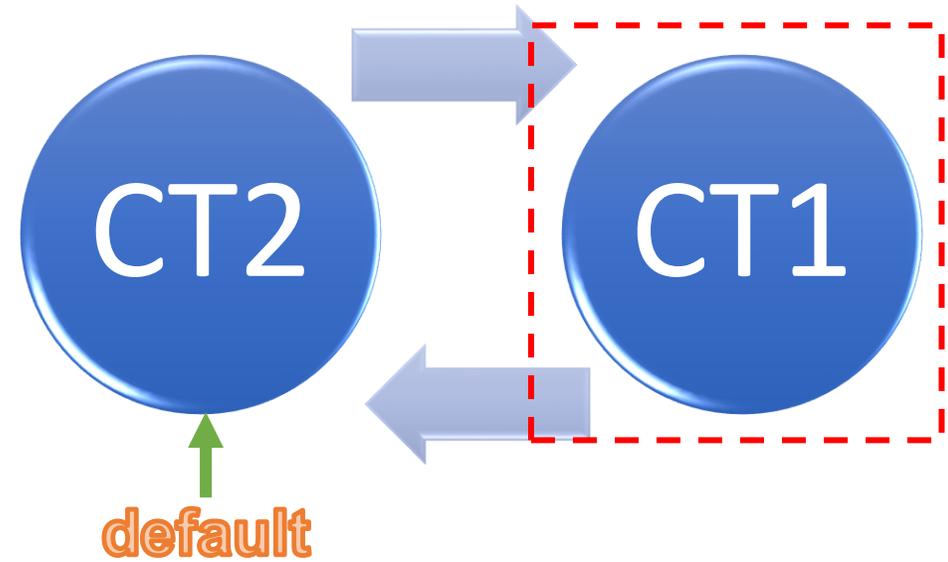

## 03 – DEVICE SETUP (GEM630-CT)

### iv. (b) Current Transformer (CT) – CT1

- Use **MD/▲** and **P▼** to set CT ratio, range form 0001 to 9999
- For example, if using a 1000/5A current transformer, CT rate should be configured as 200
- Press **E▶** to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully
- Note for MID version of GEM630-CT, only one chance is given to set the CT ratio

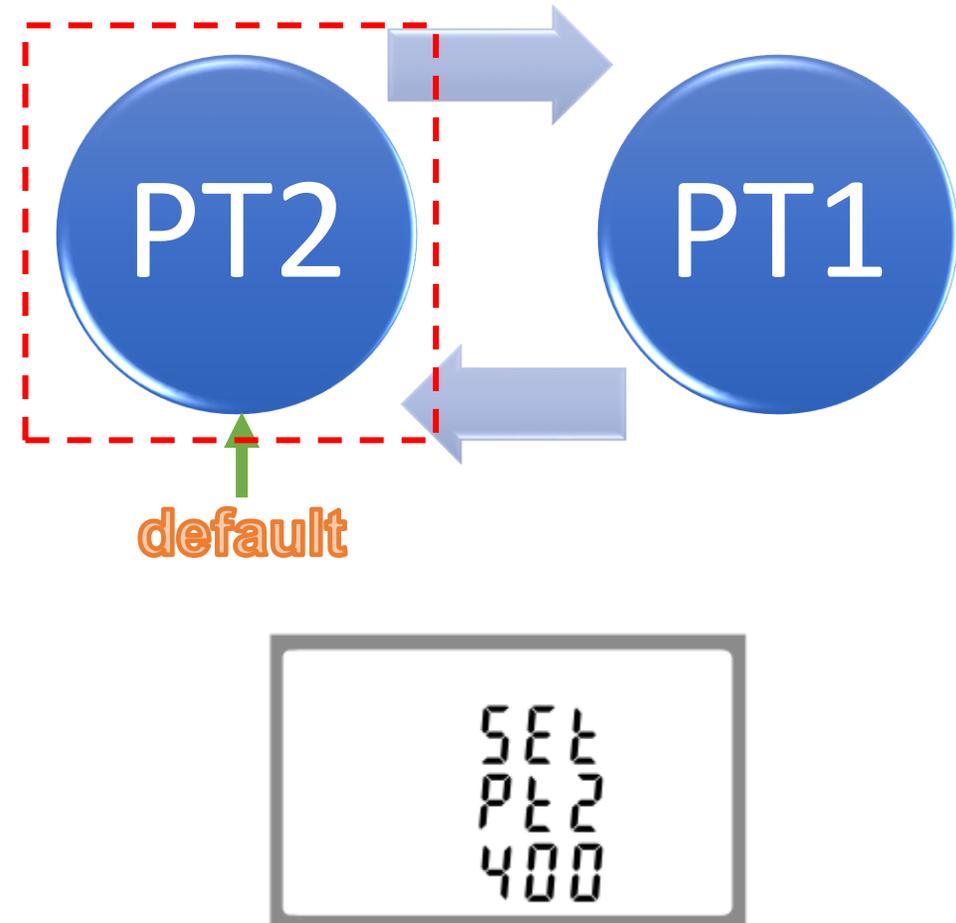

## 03 – DEVICE SETUP (GEM630-CT)

### v. (a) Voltage Transformer (PT) – PT2

- Graphic depicts the categories available inside PT, in sequence
- PT2 secondary voltage input
- Use  and  to choose the PT2 setting, range 100 to 500V
- Press  to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully

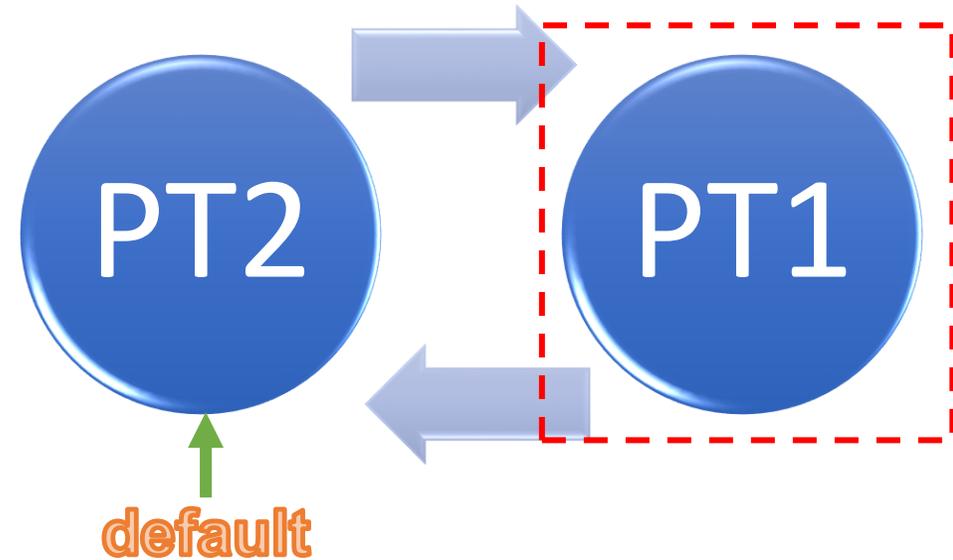

## 03 – DEVICE SETUP (GEM630-CT)

### v. (b) Voltage Transformer (PT) – PT1

- Use  and  to set PT ratio, range form 0001 to 9999
- For example, if set the ratio to be 100, it means the primary voltage equals secondary voltage x100
- Press  to confirm setting
- “SET” wording appears when new stop bit is configured and saved successfully

# 04 – FREQUENTLY ASKED QUESTIONS

## 04 – FREQUENTLY ASKED QUESTIONS

**GEM630-D**

**GEM230-D**

**GEM630-CT**

## 05 – FREQUENCY ASK QUESTIONS

**1) What is the different between GEM230-D, GEM630-CT and GEM630-D-M?**

GEM230-D – Suitable for Single Phase, direct connection up to 100A

GEM630-D-M - Suitable for three Phase, direct connection up to 100A

GEM630-CT - Suitable for three Phase, CT connection 1/5A

**2) How many CTs required for GEM630-CT for 3 phase 4 wires or 3 phase 3 wires application?**

3 CTs required and the neutral current will be automatically calculated by the power meter

**3) What is the accuracy of GEM series meter**

It comply with MID class B standard

**4) Is GEM series meter come with memory for data logging?**

No, the power meter only come with memory for recording accumulated energy and maximum demand.

Data logging function is not available on GEM series meter

**5) What is the sampling rate of GEM series meter ?**

The sampling rate of power meter is 32 sample/cycle which equivalent to 1.6kHz

**6) How many GEM series meter can be daisy chain in 1 looping?**

Theoretically is 32nos but recommend to be <20nos.

## 05 – FREQUENCY ASK QUESTIONS

### **7) What is the maximum length RS485 communication cables for GEM series meter ?**

Theoretically is 1200 meters.

### **8) Why BMS / PMS cannot read GEM series meter reading?**

Recommend to use Modscan software to connect to the power meter and read the data directly to confirm the connection and meter functionality

<https://www.youtube.com/watch?v=STBX1Nc2I0s>

### **9) Can I replace the power meter without shutdown the load?**

GEM 630-CT - It is possible but please do take note that voltage signal's fuses need to be pull out and CT secondary signals need to be short link. Whenever possible, we still recommend to replace the meter with system shutdown.

GEM 630-D & GEM230-D – Shutdown is mandatory.

# THANK YOU
