

INTERNSHIP AT EETARP

APPLICATION ENGINEER | SOFTWARE DEVELOPER

As an Application Engineer intern, you will have the opportunity to harness your technical skills and creativity to make a meaningful impact. Join our dynamic team and explore a world of exciting projects, problem-solving, and cutting-edge technology.

- Create and implement SCADA/monitoring system UI graphics and programming.
- Design customized UI graphic templates for monitoring systems.
- Improve automation for system project creation.
- Assist in drafting operation manuals and testing reports as needed.
- Get hands-on experience with on-site support, testing, and troubleshooting tasks.

PROJECT ENGINEER

Our internship as Project Engineer will provide you with a platform to expand your knowledge and apply it to practical, industry-specific solutions.

- Assist in scheduled maintenance activities.
- Prepare comprehensive maintenance reports.
- Offer on-site troubleshooting assistance as necessary.
- Collaborate closely with engineers to ensure successful project execution.
- Participate in on-site testing and commissioning activities.
- Contribute to the assembly of control panels as needed

PRODUCTION ENGINEER

Explore our Production Engineering internship opportunities and gain hands-on experience in various aspects:

- Assemble and test Isolated Power Systems (IPS).
- Participate in the assembly and testing of Remote Terminal Units (RTUs).
- Prepare raw materials for production and assembly processes.
- Conduct inspections on returned defective devices, with a focus on power and energy meters.
- Assist in stock receiving and issuing activities.
- Learn to create drawings using CAD software. Join us and develop your skills in a real-world manufacturing environment.
